

**AMENDMENTS TO THE CLAIMS**

**This listing of claims will replace all prior versions and listings of claims in the application:**

**LISTING OF CLAIMS:**

1. (original): A phosphor characterized by being represented by the formula

$\text{Eu}_{2-x}\text{Ln}_x\text{M}_y\text{O}_{3(y+1)}$ , wherein  $0 \leq x < 2$ , Y is 2 or 3, Ln represents at least one member selected from among Y, La, and Gd, and M represents at least one member selected from the group consisting of W and Mo.

2. (original): A phosphor characterized by being represented by the formula

$\text{Eu}_{2-x}\text{Ln}_x\text{M}_2\text{O}_9$ , wherein  $0 \leq x < 2$ , Ln represents at least one member selected from among Y, La, and Gd, and M represents at least one member selected from the group consisting of W and Mo.

3. (original): A phosphor characterized by being represented by the formula

$\text{Eu}_{2-x}\text{Ln}_x\text{M}_3\text{O}_{12}$ , wherein  $0 \leq x < 2$ , wherein Ln represents at least one member selected from among Y, La, and Gd, and M represents at least one member selected from W and Mo.

4. (original): A phosphor as described in claim 2, wherein x in the formula  $\text{Eu}_{2-x}\text{Ln}_x\text{M}_2\text{O}_9$ ,

satisfies the condition  $0 \leq x \leq 1.5$ .

5. (original): A phosphor as described in claim 3, wherein x in the formula

$\text{Eu}_{2-x}\text{Ln}_x\text{M}_3\text{O}_{12}$  satisfies the condition  $0 \leq x \leq 1.8$ .

6. (currently amended): A phosphor as described in claim 1~~any one of claims 1 to 5~~, wherein M is W.

7. (currently amended): A phosphor as described in claim 1~~any one of claims 1 to 6~~, wherein Ln is Y.

8. (currently amended): A phosphor as described in claim 1~~any one of claims 1 to 7~~, which has a particle size of  $50 \mu\text{m}$  or less.

9. (currently amended): A phosphor as described in claim 1~~any of claims 1 to 8~~, which emits red light.

10. (currently amended): A light-emitting device comprising a light-emitting element and a phosphor as recited in claim 1~~any of claims 1 to 9 in combination~~.

11. (original): A light-emitting device as described in claim 10, wherein the light-emitting element is a nitride semiconductor light-emitting element and emits light having a wavelength falling within a range of 220 nm to 550 nm.

12. (currently amended): A light-emitting screen employing a phosphor as recited in ~~claim 1 any of claims 1 to 9.~~

13. (currently amended): A method for producing a phosphor as recited in ~~claim 1 any one of claims 1 to 9,~~ characterized in that the method comprises firing at 800 to 1,300°C a mixture containing europium oxide or a compound forming europium oxide through heating; yttrium oxide, lanthanum oxide, gadolinium oxide, or at least one compound forming any of these oxides through heating; and tungsten oxide, molybdenum oxide, or at least one compound forming any of these oxides through heating.
